REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: **the specific limitations of** "the rotary disk (3) being rotatable relative to the container(2), the rotary disk being made from a resilient flexible material" in the combination as claimed in **claims 1,12, 28**, are not anticipated or made obvious by the prior art in the examiner's opinion. **For example**, Kobayashi et al. (5,823,861) disclose a grinding machine comprising a stationary container (1); polyurethane a rotary disk (5) placed above a container base for forming a finite gap (S) with respect to the container wall (see fig. 2) the rotary disk being rotatable relative to the container (see fig. 2). Kobayashi et al. also disclose the size of the finite gap between the rotary disk and the container wall being smaller than the spacing of the disk from the container (see fig. 2). **However**, the art of record considered as a whole, alone or in combination fails to provide or suggest "the rotary disk being rotatable relative to the container, the rotary disk being made from a resilient flexible material".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Ojini whose telephone number is 703 305 3768. The examiner can normally be reached on 7 to 4 Tuesday-Friday with every other Monday off.
